

Seabird Incident Report

Through responsible management and best practice operations, we strive to farm our King salmon in harmony with the natural environment, minimising any negative impacts on local wildlife.

Seabirds naturally gravitate towards farm structures as a perching ground and source of food, although we endeavor to prevent fatalities, they unfortunately can occur.

All fatal seabird interactions are reported within 30 days of the occurrence.

Date	Sea Farm	Bird Type	No. of Birds	Conservation Status	Action Taken	Report to DoC	Summarise Incident
